

# Sony VIRTUOSO™ APT SOFTWARE SUITE

## A Simple Solution to: Develop Student Speaking Skills, Administer Testing and Much More...

The Sony Virtuoso™ APT (All Purpose Testing) Instructional Control Software suite, is a simple, cost effective solution for language instruction, student oral practice, and administration of standardized oral language testing like that required in the Free Response Section of the AP® world language exams.\*

*Instructor interface.*

*Student digital recorder.*

With an intuitive instructor interface and simple student digital recorder, its easy to send course/test materials, and save student audio recordings. Working on a PC based local area network, with nothing more than good quality headsets, you are ready to get started.

### Oral Proficiency Testing Made Easy

The Virtuoso APT Software Suite Student Digital Comparative Recorder is easily controllable by any instructor or test administrator. This simplicity makes it ideal for oral proficiency testing as the student record function may be started and stopped remotely as dictated by the design of the test and the amount of time allowed for each stimulus and verbal response.

For students, the focus is taken away from the technical aspects of completing an oral proficiency exam, helping them direct their attention to listening and responding to the best of their ability.

At the end of the exam, student recordings are easily collected by the instructor for later review and evaluation.

### Speaking Practice

The Oral Practice feature allows the student to individually listen to an audio segment and then respond. The audio may be from a digital file in .wav or .mp3 format, a CD, an instructor's voice, or an analog source. The instructor is able to monitor each student as they work through their responses, intercom with and coach students one-on-one, and then collect the student recordings for assessment.

### Multiple Choice Testing

Giving multiple choice or true/false tests is also easy. Students quickly respond to questions using the buttons on their digital recorders. Responses can then be saved, and, with built-in tools, feedback is provided. The results may also be printed or saved to a file for later evaluation.

# COMMUNICATE WITH STUDENTS AND MANAGE CLASS ACTIVITY.

## INSTRUCTOR-STUDENT COMMUNICATION

### ■ ALL CALL

Enables the instructor to communicate via headset with the entire class. This is especially helpful when proctoring a test with verbal instructions.

### ■ INTERCOM

Allows the instructor to work with students individually without disturbing others.

### ■ CALL

Students can easily alert an instructor or test administrator when they need assistance.

### ■ LISTEN

Audibly monitor each student's progress.

## INSTRUCTIONAL CONTROL

### ■ OPEN/CLOSE FILE

The instructor is able to direct students by selecting and opening/closing files for them.

### ■ COLLECT RECORDINGS

At the end of an exam or activity the instructor can easily collect and save student recording files to a teacher-specified folder.

### ■ DISABLE WINDOWS

This functionality keeps students on task effectively preventing them from running any other applications except what has been assigned.

## EASIER ADMINISTRATION

### ■ LOG IN

Students may attend into the system using their names or assigned ID numbers identifying each student and their recorded files.

### ■ ALARM CLOCK AND COUNTDOWN TIMER

A programmable clock makes it easy to track timed testing segments and other class activities.

## SCALABLE TECHNOLOGY

■ Another great feature of the Sony Virtuoso APT software is that you can easily add instructional features by upgrading your software within the family of Sony Virtuoso and Soloist language learning products. With our technology your investment is always protected!

■ New software licensing options are now available.
