Virtual Language Lab Platform

SANSSpace™ LIVE is a “Live Interactive Virtual Environment” designed for language learning.

Language teachers now have the flexibility to do anytime — anywhere interactive language activities with their students.

Language students get more opportunity to develop communication skills, work on speaking and listening practice, individually or in pairs, with real-time teacher feedback.

Your language lab is now in any classroom or anywhere, any day or every day.

1 to 1 and BYOD mobile schools have a platform independent, powerful teaching tool to maximize individual and group language learning— using Chromebooks™, iPads®, tablets.

SMART Technology

- Intuitive and easy-to-use teacher and student interfaces accessible from any web browser
- Communicate with all students, individual students, or pairs working together
- Pair students for listening and speaking practice
- Select and open media files & webpages for students
- Live monitoring and oversight of student activity
- Control student virtual recorders to pace and guide activities
- Text chat tool for instructor direction and class collaboration
- One-step collection of student work for review and assessment; insert text & audio comments
- Create lessons, share content, track progress and get real-time student reports
- Give students language learning mobility— using SANSSpace outside of class—anytime, anywhere
- Practice for & easily administer AP® world languages exams in the new, required digital format
