BROCHURE

As a Virtual Language Learning Platform, SANSSpace helps language teachers develop, manage, and seamlessly deliver rich multimedia course content and allows students to access it anytime, anywhere, from any device. Working in tandem with your well-planned curriculum, this controlled environment offers students the chance to engage in collaboration and student-centered learning.

EXTEND LANGUAGE LEARNING ANYTIME, ANYWHERE, WITH SANSSPACE™ VIRTUAL LANGUAGE LEARNING PLATFORM

REACH STUDENTS WHERE THEY ARE

- Language learning is now 24/7 with SANSSpace cloud-compatible virtual platform
- Access to language courses and content from almost any device—on-the-go, flexible learning with the SANSSpace Mobile App
- The virtual language lab comparative recorder facilitates student engagement in real-world listening and speaking activities for increased proficiency
- Students and teachers seamlessly share ideas using the built-in synchronous and asynchronous collaboration tools
- Instructors use the progressive tracking tools to assess student and group learning competencies
- Text, verbal, and video instructor feedback placed within each student's work provides a framework for students to reflect, review, and revise their output to improve communication skills

STUDENTS STAY CONNECTED WITH YOU AND WITH LANGUAGE

Today teaching and learning take place in schools with a set schedule, in virtual settings without specific time parameters, and as a blended experience with both fixed and virtual learning. As teachers, you are challenged by the need to engage a variety of learners at a variety of times in a variety of ways and provide them with immediate access to real-world multimedia content.

SANSSpace keeps students and teachers connected with communication tools, including live audio and video chat, forums, and announcements. Whether it's live or recorded, this virtual community provides students with more opportunities for collaborative learning with oversight and guidance. Using the SANSSpace platform, language teachers like you can set up virtual office hours and take advantage of the flexibility you have to give students individualized attention in a comfortable setting.

LANGUAGE LEARNING THAT'S AS MOBILE AS THEY ARE

Students today are connected electronically 24/7. With the SANSSpace mobile app, language learning activities can continue wherever they are. Now they can access SANSSpace from tablets and other mobile devices. They'll find it easy to listen to an audio file or view an assigned video, do some speaking practice or check on course announcements on the fly.

DEVELOP CORE LANGUAGE COMPETENCIES

A VIRTUAL COMPARATIVE RECORDER TO DEVELOP COMMUNICATION SKILLS

To use a second language successfully in today's global setting, students need to develop communication skills and understand the culture of the language they're studying. The SANSSpace virtual comparative recorder delivers high-quality audio and video content and enables students to comment or respond to questions, as well as save their work. Students can then listen to the audio or view the video content simultaneously with their recording for comparison and reflection.

You provide feedback and guidance simply by inserting text, audio or video comments at any point within a recording. Portfolios or a cumulative body of recordings can be saved, so students have a history of their progress and achievements and can use this information for future academic or career planning.

Use the comparative recorder to insert text, audio or video comments.

EASILY MANAGE COURSES AND CONTENT

Audio, video, images, documents, approved Internet sources, licensed publisher materials and other resources for lessons and activities can be easily linked or uploaded and added to your SANSSpace portal. Once loaded, these assets can be shared, reused, and repurposed, or archived and made available on a preset date. It's easy to add new courses or modify existing courses and content whenever you wish.

MORE QUALITY TEACHING TIME

If you are considering a “flipped model” to maximize learning, SANSSpace can be your delivery and management platform. Simply assign work, including listening, speaking, or language structure activities, that students can complete—and you can review—anytime, anywhere, using SANSSpace. Classtime with your students can then be used for more interactive, collaborative, and immersive activities.

TRACKING STUDENT PROGRESS

SANSSpace tracks and captures how each student interacts with multimedia content. This detailed tracking and reporting capability can be a great indicator of how fluidly students are working through course content. This also means that you can measure individual progress or gauge overall results for an entire class, allowing for easy identification of a specific assignment or concept and redirection as necessary.

This data is a great tool for administrators to use in future planning and the calculation of ROI (return on investment). In addition, students can assess their own progress with the data that is provided specifically for them in the courses they are enrolled in.

MEETING THE NEEDS OF TODAY'S LEARNERS—AND TEACHERS

With today's students using technology to learn in constantly evolving ways, SANSSpace offers the virtual language learning platform that reaches them at home, at school, at play. Connect with your students with content, collaboration, and feedback. SANSSpace extends language learning to your students anytime, anyplace. It's a classroom that's as mobile as they are.
